KELAS : TI 2

POLITEKNIK PURBAYA
PROGRAM STUDI TEKNIK INFORMATIKA
2026

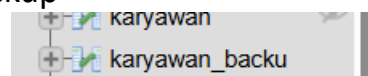

1. Pilih tabel yang ingin di backup

2. Buat tabel namatabel_backup

```
1 CREATE TABLE karyawan_backup LIKE karyawan;
```

3. Klik tabel karyawan_backup

4. Isi query untuk membackup tabel karyawan

```
1 DELIMITER //
2
3 CREATE PROCEDURE sp_backup_karyawan()
4 BEGIN
5 INSERT INTO karyawan_backup
6 SELECT * FROM karyawan;
7 END //
8
9 DELIMITER ;
```

5. Memanggil data backup

Gunakan query di bawah ini untuk memanggil data yang ada pada tabel awal

```
1 CALL sp_backup_karyawan();
```

6. Tampilan setelah di panggil

Setelah di panggil maka data yang asli akan muncul pada tabel karyawan_backup

The screenshot shows a database management interface with the following components:

- Navigation Bar:** Includes buttons for Browse, Structure, SQL, Search, Insert, Export, Import, Privileges, and Operations.
- Status Bar:** Displays "Showing rows 0 - 5 (6 total, Query took 0.0006 seconds.)".
- SQL Editor:** Contains the query `SELECT * FROM `karyawan_backup``.
- Options Bar:** Includes checkboxes for Profiling, Edit inline, Edit, Explain SQL, Create PHP code, and Refresh. It also has controls for "Show all", "Number of rows" (set to 25), "Filter rows" (Search this table), and "Sort by key" (set to None).
- Table View:** Displays the data from the 'karyawan_backup' table with columns: id_karyawan, nama, jabatan, no_hp, gaji, and devisi.

	id_karyawan	nama	jabatan	no_hp	gaji	devisi
☐	1	Rudi	Manager	Produksi	99999999.99	7000000
☐	2	Salsa	Admin	Keuangan	99999999.99	5000000
☐	3	Joko	Operator	Produksi	99999999.99	4500000
☐	4	Dina	Quality Control	QC	99999999.99	4800000
☐	5	Arif	Marketing	Penjualan	99999999.99	5500000
☐	6	amel	CEO	0877665657	10.00	CEO

At the bottom, there are controls for "Check all", "With selected" (Edit, Copy, Delete), and an "Export" button.
